Getting Started with Finding Homes

What is Finding Homes?

Finding Homes is an Alexa skill that anyone can use to search for homes by voice. It can be accessed through the Amazon Alexa app or any Alexa device (such as an Echo Speaker, Echo Show, Firestick TV, or Alexa Auto).

How to I get started?

Option 1: Download the Amazon Alexa app on your phone.
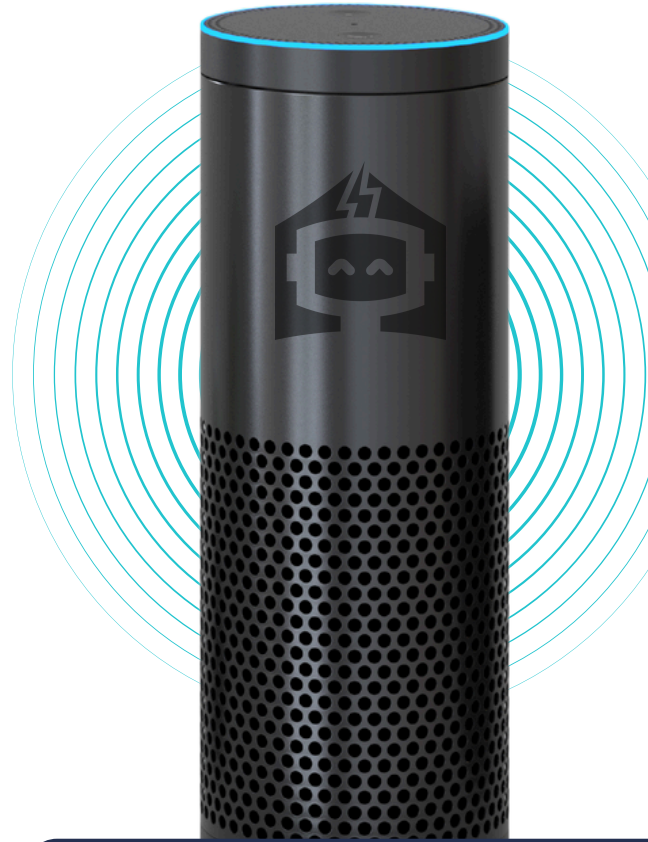

Option 2: Scan the QR code below to launch the skill.

Option 3: If you have an Alexa device in your home, just say "Alexa, start Finding Homes".

Anytime you want to start the skill, say, "Alexa, start Finding Homes."

I have started the skill, now what?

As long as you know WHERE you want to search, Finding Homes does the rest. Tell it what you are interested in looking for. The skill will ask you clarifying questions, then give you search results that most closely match your criteria.
