

OneHome

Consumer Share

Consumer Share

Introduction

Consumer Share allows OneHome users to easily **share a single listing** with close family and friends, enhancing their home-buying experience by enabling them to discuss their interests **with their inner circle**.

This feature is supported by a new **Public View Mode** which provides access to the shared listing **without** granting any additional functionality within OneHome.

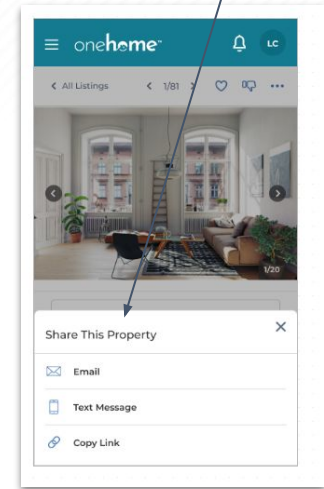

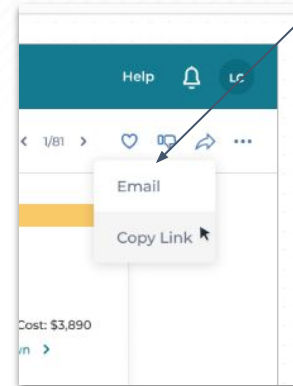

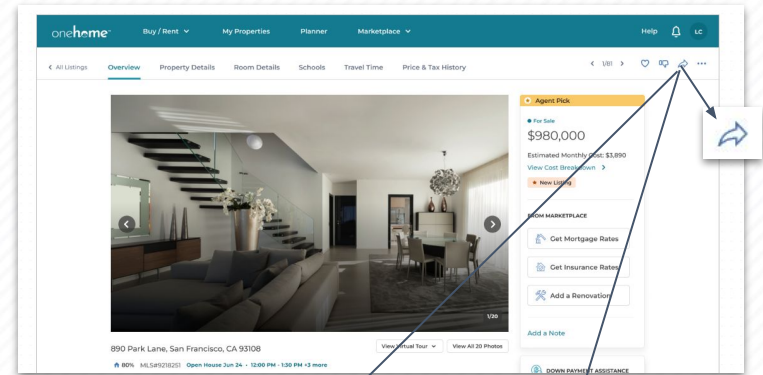

CoreLogic[®]

Find. Buy. Protect.

Consumer Share

What to Expect – OneHome

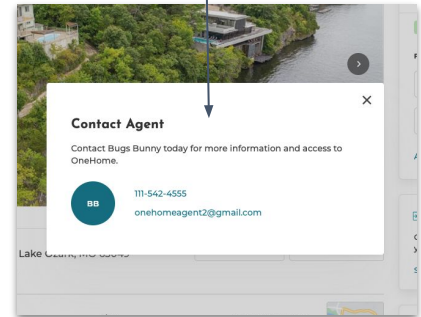

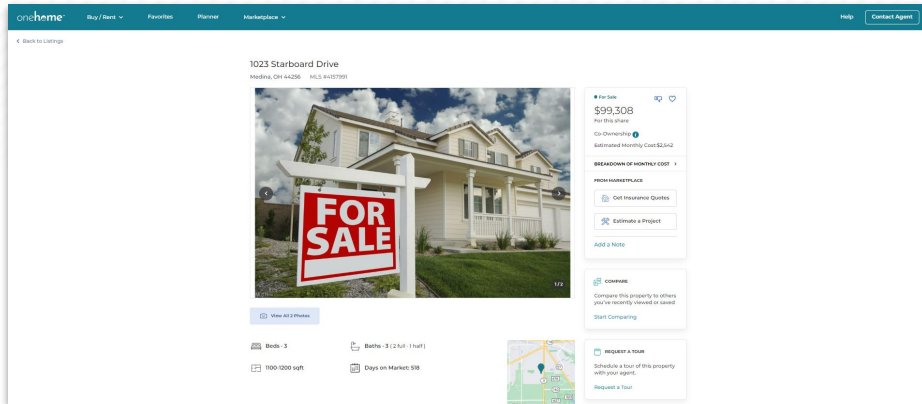

- Onehome will allow users to share an **individual listing** to public users via a **shareable link, email or text message**
- Users will select the property they wish to share, **click the ‘Share Link’ icon** to generate a public URL from the property details page which then can be posted/shared via their **communication channels and social media**
- Users will be able to **copy a link or directly email** the property to their inner circle. On **mobile**, users will be able to **text** the property on the go

Consumer Share

What to Expect – OneHome

- Public Users can **review the shared listing** and can click on the **“Contact Agent”** button to get in touch with the Agent who shared the listing from Matrix
- Once clicked, OneHome will display the Agent’s **name, phone number and email** in a pop-up modal

Thank you!
